

We are conducting a short, *4 question* survey, addressing the
“**Impact of the Unemployed on Employment Agencies**”

***P.R.O.A. score:**

It's only **4 Questions...**

Your answer will remain *Confidential*, we only want the data
(*Only REAL Data can provide REAL Change*)

If the *Poverty rate* is now _____ %
and *Unemployment* is at _____ %

then certainly this has an impact on valuable resources such as YOUR
agency. We want to help, and Can! But we need YOUR help.

We've started research in this sector and will be expanding and further
compiling it. Based on the results of **Your PLACEMENT RATIO**, we can
suggest how to improve your company score right away, OR, combine
strategies for area agencies, potentially including Government assistance in
some cases. It's all based on the CURE! If people aren't being employed,
YOUR Agency is suffering.

The GOOD NEWS is there are millions of workers, ready to for work!

Here are the questions. There are **NO** *right* or *wrong* answers.

Answers can be approximate, but cannot be Made-Up.

Fake data lets us fix fake things, not real ones...

All Responses Are For Current Year

1. Number of applicants who **APPLIED** through you? _____
2. Number of applicants **PLACED** by your company? _____
3. Number of **OPEN** positions currently available? _____
4. What is the **BIGGEST** Challenge your company faces today

Thank You for your responses
